Projects

Archipelago Hosting Service | Personal (current) | github.com/Titanium-Lung/archipelago-csh

Programmed a website with a Python backend using Flask which connects to a React frontend using http requests.

- Fetch data from backend by efficiently reading stored files in the form of Python dictionaries
- Efficiently mass add data to a PostgreSQL database, for later analysis using SQL queries
- Workers interact with subprocesses using TCP
- **Tools Used:** Python, Flask, Javascript, React, Git, PostgreSQL, Docker, Gunicorn

Mock Ufund Website | Class (2025)

Programmed a Java backend using REST API which connects to an Angular frontend with a team of 4 people

- Utilised Java classes and interfaces to write readable and easy-to-expand code
- Stored class data in ArrayLists and HashMaps for easy access by other classes
- **Tools Used:** Java, REST API, Git, Angular

Basketpong | Personal (2025) | github.com/Titanium-Lung/basketpong

Utilized Godot to create a 2D game that is a mash up between Pong and Basketball.

- Coded functionality for collisions and ball physics
- Designed a UI that the player uses to navigate through the game's multiple pages
- **Tools Used:** Godot, Git

Work Experience

Undergraduate Research Assistant

Rochester, NY

Rochester Institute of Technology

Aug 2026 – Present

- Researched papers related to using LLMs to improve security of protected healthcare information
- Completed training regarding dealing with data collected from human subjects
- **Skills Used:** Teamwork, Research

Activities

Computer Science House

Rochester, NY

Learning community supporting member growth in various computing disciplines

Aug 2024 - Present

House History Director

Jun 2026 – Present

- Supervising over House History operations
- Maintaining, upholding, and promoting house traditions
- Contacting companies in order to find a venue for house's annual formal dinner
- Discussing and voting on issues presented to E-Board
- **Skills Used:** Communication, professional email
